COMMERCIAL DESIGN SERVICES

# Welcome to HAMERNICK'S

**Chosen by Locals, Loved for a Reason**

Family-owned since 1947, Hamernick's has grown from a small St. Paul shop into a leading flooring provider across Minnesota and Western Wisconsin. We offer high-quality, in-stock flooring with expert design support, accurate estimating, and professional installation for multi-housing, residential, and commercial spaces.

Since 2000, Lynn and Ted Natus have expanded the family legacy, building Hamernick's into a trusted name in the commercial design space. From office build-outs to hospitality renovations, we partner with businesses, contractors, and architects to deliver stylish, durable, and functional flooring solutions—on time and on budget.

Meet Our Designer

*Nancy Hagert*

With over 35 years of experience, Nancy is a seasoned interior designer and commercial project manager known for her thoughtful approach, attention to detail, and ability to bring each client's vision to life.

She has successfully led projects across medical offices, tenant build-outs, senior living communities, banks, and restaurants—always balancing functionality, aesthetics, and long-term quality.

At Hamernick's, Nancy collaborates directly with clients to craft tailored design concepts that go beyond flooring. While flooring is the foundation, she thoughtfully integrates wallcoverings, lighting, furniture, and artwork to deliver cohesive, impactful spaces that meet commercial design standards and exceed expectations.

# FROM CONCEPT TO COMPLETION:

## *Inside the Project Path*

### Design Development

We consult with clients to create tailored, functional designs that go beyond flooring and align with the full vision of the space.

### Bidding & Preparation

After design approval, we plan, bid, and prep—coordinating materials, timelines, and budgets for a seamless installation.

### Installation & Completion

We manage installation from start to finish—overseeing crews, timelines, and budgets to deliver a seamless, high-quality result.

# Step One: **DESIGN DEVELOPMENT**

The process begins with a thorough consultation to understand the unique needs, goals, and branding of the space.

Our designers collaborate with clients, architects, and contractors to create tailored design concepts that go beyond flooring—incorporating elements like wallcoverings, lighting, furniture, and artwork.

Material selections are curated to suit both aesthetics and functionality, ensuring every detail aligns with the overall vision.

Throughout this phase, we prioritize both creativity and practicality, resulting in cohesive and efficient designs.

*Step Two:*

## BIDDING & PREPARATION

Once the design is finalized, we move into project planning and bidding. This includes generating detailed material specifications and finish schedules to support accurate bids. We provide value-engineered flooring options that align with budget expectations without compromising quality.

Our team coordinates with subcontractors and suppliers to ensure product availability and lead time alignment. Every step is documented and prepared with precision, setting the foundation for a smooth installation process.

## Step Three:

# INSTALLATION & COMPLETION

Our project managers oversee every aspect of the installation phase—from coordinating deliveries to managing on-site crews and timelines.

We ensure the work is completed to spec, on schedule, and within budget. Communication with clients remains consistent throughout, allowing for any adjustments or updates to be handled proactively. The end result is a polished, functional space that meets the original design intent and exceeds client expectations.
